## STEP 3: SELECT ONE APPLICATION:

## STEP 4: ENTER APPLICATION NAME

STEP 5: CREATED NEW APPLICATION:

STEP 6: SELECT ONE FORM:

STEP 7: THE SOFTWARE HAS BEEN CREATED.

The screenshot displays a web application interface for 'Booking Movie Ticket'. On the left, a dark sidebar contains a menu with 'User Details' selected. The main area shows a 'user details' form with the following fields: 'Name' (split into 'First Name' and 'Last Name'), 'Phone' (with a country code dropdown set to '+91' and a number input '81234 56789'), 'Email' (with an email icon), 'Date-Time' (with a calendar icon), 'Theatres' (split into 'First Name' and 'Last Name'), and a 'Drop Down' menu currently showing 'Select'. At the bottom of the form are 'Submit' and 'Reset' buttons. On the right, a 'Form Customization - Web' panel shows 'Label placement' options with various input field layouts.

This screenshot shows the same 'Booking Movie Ticket' application with additional panels. On the left, a 'Basic Fields' panel lists icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The central form area now includes a 'Name' field with a trash icon, and fields for Phone, Email, Date-Time, Theatres, and Drop Down. On the right, a 'Field Properties' panel is visible, containing sections for 'Field name' (with a dropdown set to 'Name'), 'Field link name' (with a text input 'Name'), 'Validation' (with a 'Mandatory' checkbox), 'Display Fields' (with checkboxes for 'Prefix', 'First Name', 'Last Name', and 'Suffix'), and 'Data Privacy'. A 'Done' button is located at the top right of the interface.

Result:

The car booking and reservation was created successfully.
